# KOMILI

## ABOUT US

Komili and Komili Yuvam are products of of Yıldız Holding started to produce tissue paper from 100% virgin wood pulp in September 2011 using "Viscosoft Technology", which is used for the first time in Turkish paper tissue industry. Thanks to the Viscosoft Technology, We produce the softest toilet paper and most absorbent paper towel in Turkey with eco-friendly production practices.

We carry out its tissue paper manufacturing and converting operations in stakeholders, to continue Pamukova-Sakarya, in a total area of 200.000 m2 with a capacity of 140.000 ton/year in paper production and 120.000 ton/year in converting.

Komili and Komili Yuvam Paper products are produced highest hygiene standards.

## MISSION

In order to meet the expectations of our customers and stakeholders, to continue producing eco-friendly, differentiated high quality tissue paper by employing highest hygiene standards with hands-free state of the art production.

## VISION

To become a leader brand in paper tissue industry.

A total area of 200.000 m<sub>2</sub> with a capacity of 140.000 ton/year in paper production and 120.000 ton/year in converting.

# PRODUCTION & QUALITY

YeniTeközel accept the system as a whole, and quality is the priority of everyone involved within this system. With this perspective, We certified Quality Management Systems in its first year of production, because quality is value and respect offered to customers.

Operations have started in 2011 with tissue mill and converting facilities and is able to produce tissue paper between 12 gr/m<sup>2</sup> and 40 gr/m<sup>2</sup> from 100% virgin wood pulp.

In modern facilities, where hygiene and human health are kept in the forefront, raw materials and chemicals are carefully selected and eco-friendly products that are in line with human health are produced. Products, in which water resistance is a desired quality (such as paper towel and napkin), certified chemicals that are proven to be suitable for direct food contact are preferred for manufacturing.

# MANAGEMENT SYSTEMS

## TS EN ISO 14001:2015 ENVIRONMENTAL MANAGEMENT SYSTEM

We determine the environmental factors, are taking control of the entire process and do not harm the environment. The Environmental input comprises of the standard requirements to ISO 14001:2004 to demonstrate a positive view of environmental issues and the impact on the environment by controlled processes.

## ISO 9001:2008 QUALITY MANAGEMENT SYSTEM

We follows the highest technology and the best practices, for producing the best quality. The Quality input comprises of standard requirement to ISO 9001:2008 and covers the functions performed by operating areas to achieve product and service realisation through process control.

## ISO 50001:2011 ENERGY MANAGEMENT SYSTEM

We ensure the efficient use of energy ISO 50001:2011 specifies requirements for establishing, implementing, maintaining and improving an energy management system, whose purpose is to enable an organization to follow a systematic approach in achieving continual improvement of energy performance, including energy efficiency, energy use and consumption.

## ISO 27001:2013 INFORMATION SECURITY MANAGEMENT SYSTEM

It protects all assets related to information security controls and we make sure to give confidence to the parties.

## FSC

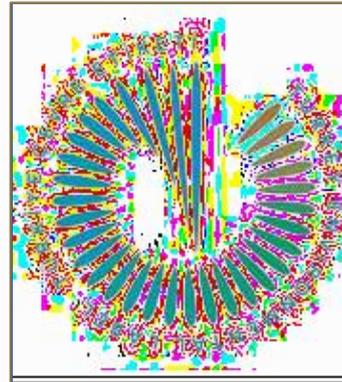

Preserving natural resources is a top priority for us, which is why we procure all our cellulose raw material from providers who are certified members of "Sustainable Forest Management" systems. This means that timber, which is the raw material of cellulose, is sourced from legally managed forests and that the number of trees planted is greater than the amount harvested. Certified suppliers in these systems undergo regular audits by independent firms to ensure that they are abiding by their guidelines. Protecting forests for future generations.

# MANAGEMENT SYSTEMS

## EU ECOLABEL

We were entitled on January 2018 to obtain the Ecolabel certificate, which proved to be environmentally and friendly production, meeting European Union Ecolabel Label criteria for Toilet Paper and Towel products.

## ENVIRONMENTAL LABEL:

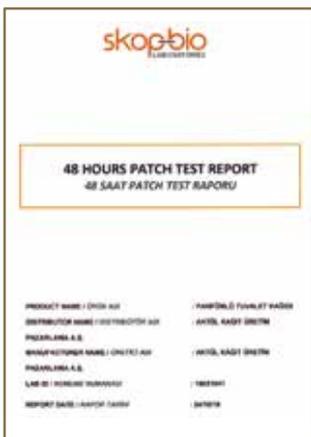

We are one of the first companies to be awarded with Environmental Label by General Directorate of Environmental Impact Assessment, Permission and Inspection of T. R. MINISTRY OF ENVIRONMENT AND

CITY, within the project of 'The establishment of the National Environmental Label System' in Turkey.

## CERTIFICATE OF COMPLIANCE

Komili, Komili Yuvam, Blume, Confort Jumbo Kitchen Towel have 'Food Compatibility Certificate' in ISEGA Laboratories.

## DERMATOLOGICAL CONFORMITY CERTIFICATE

All our perfumed toilet paper products have dermatological conformity certificates.

# ENVIRONMENT POLICY

We make eco-friendly production by choosing technologies that use natural resources efficiently and protects ecological balance. In choosing chemicals, We prefer the ones that are deemed not harmful to human health and environment.

In the context of its environmental consciousness, Our stores its wastes in accordance to waste management regulations and eliminates them through licensed firms.

We discharges cleaned water from the effluent plant since the first day of its productions without harming nature.

We strictly fulfills all regulatory requirements and is in full regulatory compliance and precisely tracks environmental regulations, water, waste water, noise and emissions and disposals regularly.

In choosing chemicals,  
We prefers the ones  
that are deemed  
notharmful to  
human health and  
environment. //

# CONSUMER TISSUES

## PRODUCTS

### KOMİLİ

- TOILET PAPER
- PAPER TOWEL
- NAPKIN
- HANDKERCHIEF

### KOMİLİ YUVAM

- TOILET PAPER
- PAPER TOWEL
- NAPKIN

Our aims to provide quality tissue paper for the consumers at an affordable price through following the highest technology and best practices. In this context, it manufactures high quality tissue paper in its tissue mill with a capacity of 140.000 ton/year and converts this high quality tissue into branded products Komili and Komili Yuvam.

# KOMİLİ TOILET PAPER

Komili toilet paper provides both softness with the helps of Viscosoft Technology and extra-absorbency by taking advantage of having micro-cells within the texture.

3-ply Komili toilet paper is produced from 100% virgin wood pulp and you can feel the difference immediately after your first touch.

Komili toilet paper does not decompose immediately during wet usage and does not clog the toilet by dissolving quickly after certain time of exposure to water.

You can use Komili toilet paper with 100% trust which is produced with the highest hygiene standards with hands-free state of the art production.

# KOMİLİ TOILET PAPER

# VISCOSOFT TECHNOLOGY

Viscosoft Technology-originally named ViscoNip- is an innovative technology developed by Valmet ~aSwedish company. This production technology ensures that the tissue is softer and bulkier. We are an early adopter of this innovative technology by being the first company in Turkey and within top five in the world.

Viscosoft Technology is an innovation with regards to product quality and process efficiency. Value added to the product is increased softness, absorbency and bulkiness. Value added to the production is energy saving efficiency. Thanks to Viscosoft Technology, We produces softer, bulkier and more absorbent tissue paper.

We are an early adopter of this innovative technology by being the first company in Turkey and within top five in the world. ”

# KOMILI PAPER TOWEL

With the help of micro-cells within its texture, Komili paper towel provides extra-absorbency.

While absorbing water immediately, 3-ply strong texture does not decompose immediately when contacted with water.

Special texture provides extra-softness, so Komili Paper Towel can be used even on delicate surfaces with 100% trust.

Easy to use with select-a-size option.

# KOMİLİ YUVAM PAPER TOWEL

Komili Yuvam Paper Towel ensures that the product has high absorbency and durability by using new Absorbent Cell Technology that is used for the first time in Turkey.

Absorbent Cell Technology is technically referred as 4D Technology by its originator Fabio Perini – an Italian company- and it is an innovation in embossing. This technology brings an innovative engraving technique that maintains a good balance between the tissue's physical parameters and in particular, strength. The tissue is embossed with patterns in different depths and angles and gain extra strength and durability without sacrificing features such as absorbency softness and water holding capacity
