FROZEN

CATEGORY PRODUCTS

Ülker Marifet, provides wide variety of frozen product alternatives and offers practical and fast solutions to its customers.

Delicious and innovative products, are produced untouched by experienced staff and are packaged by IQF freezing which is the best food preservation methods.

After packaging, products are stored at -18°C in a fully automatic frosted warehouse and reaches customers with vehicles with an internal temperature of -18°C , preserving the cold chain.

As well as taste, products do not lose their freshness of the first day with uninterrupted storage and transportation in the cold chain, without the risk of physical and microbial deterioration.

FROZEN PASTRY PRODUCTS

We Preserve the Freshness of Our Products in the Field !

The journey of our products begins with planting healthy seeds under the control of Agricultural Engineers.

Our products are harvested right in the season when their nutritional values reach the highest level. After a few hours after harvesting, we sort and clean the products in detail with modern methods, and then we preserve their nutritional values with their freshness on the harvest day by shocking them at **-40** degrees.

We handle every stage of our products from seed to reaching your table with utmost care, and we present our products with superior taste and quality. We have Metal Dedector, X-Ray and Sorter Machines in our process to have the standart quality without any foreign material.
